## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-60 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: Although Abrosimove et al. (US PAT No. 6,741,095) teaches a data transmission system, one of ordinary skill in the art would not have been motivated to modify the teaching of Abrosimove et al. to further includes, among other things, the specific of a transmitter having the communication section receiving as the control signal from the receiver being connected to a second end of the transmission line an instruction signal for instructing whether or not to change the current amount of the driving current, the instruction signal being generated based on whether a signal value detected at the second end of the transmission line falls within a predetermined range or not (claims 1, 19, 29, 30, 41, 51), the specific of receiver having a signal generation section for, based on the detection signal, generating an instruction signal for instructing whether or not to change current amount of the driving current where the communication section outputs the instruction signal to the transmitter (claims 10, 24, 35, 40, 46, 56).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### **Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Haycock et al. (US PAT No. 6,597,198) discloses a current mode bidirectional port with data channel used for synchronization.

Satou et al. (US PAT No. 6,937,059) discloses an output buffer circuit with control circuit for modifying supply voltage.
